

NEW PRODUCT ANNOUNCEMENT!

Bigger Just Got Better

Most bariatric wheelchairs are made to be very strong.

And that's GOOD!

But most of them get that strength at the expense of design and size flexibility.

And that's NOT GOOD!

Larger patients have weight swings up AND down, and you need to be able to accommodate those changes...without changing chairs.

INTRODUCING

The Falcon™ Bariatric ACT™ 60° Center of Gravity Tilt

Specifically designed to fit all the high weight capacity bases (for clients up to 600 pounds) and still be adjustable in Width, Depth, Arm height, Arm angle, Flip back arm stop position, Backrest angle and Headrest angle and position.

For the Best in Bariatrics – “The Time to ACT is Now!”™

To find out more, call us at 1.800.370.6808 or check out our website at www.phoenixgroup-online.com.
