

FALCON™ ACT™ 60° CENTER OF GRAVITY TILT

Product Code: ACTUL

DESCRIPTION

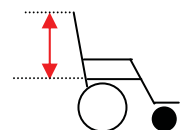

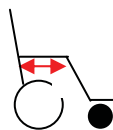

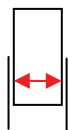

The Falcon™ ACT™ Center of Gravity Tilt has been engineered to provide optimum flexibility in configuration for the Medicare and Light Rehab patient. When you are confronted with limited reimbursement, having a single price that includes arms and legs is of substantive value to the client as well as the referring physician. Adjustability in width, depth, back angle, arm height & angle, along with multiple stop positions on the flip back arms all of which can be easily accomplished in a matter of minutes with no special tools, simplifies client fitting and reduces tech service time.

FEATURES

- Simple adjustment of width and depth of up to five inches – makes this an ideal choice for new injuries or clients with anticipated changes in body size.
- Height and angle adjustable arms simplify proper fitting without the need for special tools or parts.
- Adjustable back angle from 85° to 110° simplifies proper fitting with no special tools or parts.
- Built in arm “stop” positions accommodates either easy client access or assisted client transfer.
- Unique Gel Ovation™ arm pads, for even pressure distribution and improved comfort, come standard.
