

FALCON™ 60° POSTERIOR 90° SWIVEL TILT

Product Code: N/A

DESCRIPTION

The Falcon™ Swivel Tilt has been engineered to meet the needs of the scooter user whose medical conditions now require posterior tilt for pressure relief. The Falcon™ Swivel Tilt is available in both a manual swivel model for the client with attendant help, and a power version for the client who needs to be able to perform the swivel function independently. For safety reasons, it can perform the tilt function only when in the straight forward or 0° swivel position.

FEATURES

- 60° Center of Gravity Tilt - more than others offer - maintains maximum stability while giving complete pressure relief.
- Efficient, quiet Linak™ actuators use only 2/3 the battery and eliminate need to set limit switches
- Adjustable back angle from 85° to 110° simplifies proper client fitting without the need for special tools or parts.
- Interfaces with most OEM and 3rd party electronics and accessories.
- Unique Gel Ovation™ arm pads, knee buttons, and calf panel - which more evenly distribute pressure and improve client comfort – are standard with Falcon arms and legs.

SPECIFICATIONS

Seat Weight (lbs)	Available Widths (inches)	Available Depths (inches)	Accepts Riser	Accepts Power ELR	Client Capacity (lbs)	Bariatric Capacity (lbs)	Back Height (inches)
