

FALCON™ TILT CONVERSION KIT

Product Code: TCK

DESCRIPTION

The Falcon™ Tilt Conversion Kit was designed and engineered for clients with existing rehab seating who now are in need of a tilt system. This simple conversion system is also ideal where cost is a pressing concern. These kits convert many of the most popular power bases having rehab seating to a 60° Center of Gravity Tilt system. Because they are both easy to install and cost effective, they allow clients the option of a modern center of gravity tilt system for less.

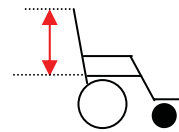

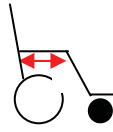

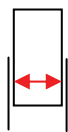

Shown with Invacare seat

FEATURES

- 60° Center of Gravity Tilt - the industry leader - maintains maximum stability while giving complete pressure relief.
- Steel construction with high temperature TIG welding to insure durability
- Designed to fit the most popular bases from Invacare, Quantum, and Quickie.
- Interfaces with most OEM and 3rd party electronics and accessories.
- Efficient, quiet Linak™ actuators use only 2/3 the battery and eliminate need to set limit switches
- Easy to install.
